Bob:

Here is a copy of the pricing I sent last month. I will have Phil ship you one of the units right away. It will probably be the display part only since the cart and battery pack are what made the packing unstable. I'll copy you the waybill.

Gil

12/30

Bob:

The UPS tracking # is 1Z3068T41295853029, 3rd day air. The manufacturing cost for this limited number of units was quite high due to the low volume and that they are twice as big as the one you saw. These would be "Center Court" ~~premium models~~. These units cost ~~us \$ 1,200.00 each to manufacture~~. With economies of scale the cost should be around \$ 800.00 - \$ 900.00. The smaller units with the 7 segment display should come in at about \$ 500.00 - \$ 600.00 manufacturing cost. Phil is building 5 of these in January.

I'll contact you after you get the first unit.

Have a great New Year. Gil
